

PAYTM BUILD FOR INDIA — TRACK 1: MERCHANT GROWTH AI

VyaparDost AI

The Zero-Touch AI Business Partner — converting passive Paytm transaction data into proactive revenue execution.

Solo Developer: Niveditha *(AI Engineer)*

THE PROBLEM

Merchants have the data. They just never act on it.

No Time to Look

Kirana owners work 12–14 hours a day, alone. Opening a dashboard and reading a chart is a luxury they don't have.

Churn Is Invisible

Regular customers quietly stop visiting. The merchant only feels the symptom — a slow week — long after the cause.

No One to Act

Fixing it means designing an offer and sending it — a full marketing job a one-person shop can't staff.

THE SOLUTION

An AI business partner that talks to the merchant

VyaparDost AI uses the Paytm Soundbox — a device already on the merchant's counter — to proactively flag revenue opportunities, take action with one voice approval, and report results back, all without opening an app.

Detects hidden revenue opportunities from transaction history

Speaks to the merchant in their own language via Soundbox

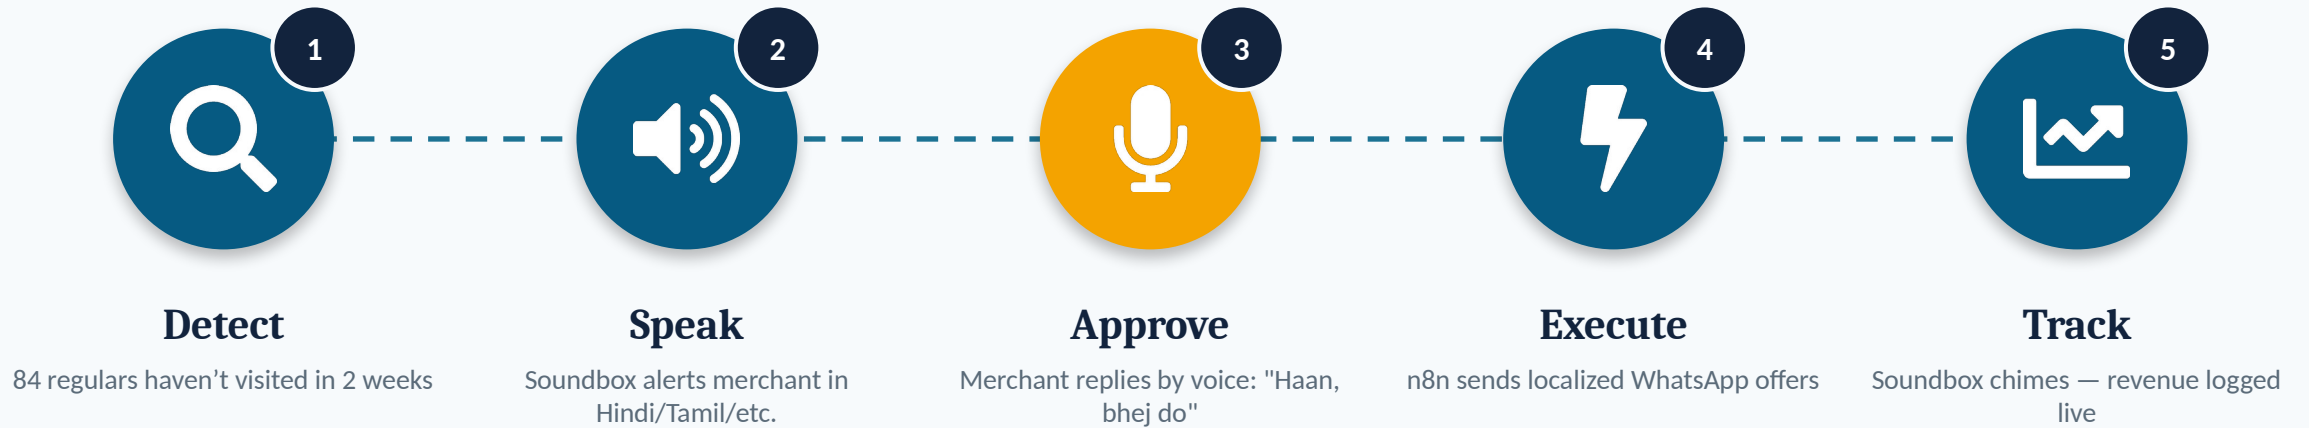

Acts only after a simple voice approval — zero typing

Speaks. Decides. Acts.

HOW IT WORKS

From silent data to a completed sale

ARCHITECTURE

Four technologies, one autonomous loop

Sarvam AI

Vernacular ASR, TTS & NLP

Drives natural voice dialogue through the Soundbox and writes localized customer offers.

Cognee

Graph Knowledge Base

Maps purchase frequency, basket size, churn windows and repeat-customer patterns.

n8n

Autonomous Orchestration

Segments customers, generates campaigns, dispatches WhatsApp messages, tracks responses.

Soundbox + WhatsApp

Merchant & Customer Touchpoints

Proactive voice alerts to the merchant; localized offer delivery to lapsed customers.

DEMO IMPACT

Lakshmi Kirana Store — one week with VyaparDost

84

Lapsed regulars detected

₹27,400

Recoverable revenue found

29

Customers won back

3.8×

Campaign ROI

"Sharma-ji, that customer just returned — ₹340 recovered from your campaign."

Closed-loop ROI, spoken back to the merchant the moment it happens — via the Soundbox's daily audio summary.

WHY IT FITS THE BRIEF

Built for Track 1: Merchant Growth AI

"AI business partner"

VyaparDost is a partner that acts, not a tool the merchant must operate.

"Think beyond payments"

Built on transaction data, but delivers growth — marketing, retention, revenue.

"Trusted business copilot"

Every action needs the merchant's voice approval — nothing happens silently.

"Scalable for millions"

Rides on Soundbox — infrastructure already live in millions of shops.

Not a smarter dashboard. The growth employee every merchant needs but can't afford to hire.
